The query then displays the last name and hire date of any employee in the same department as the employee whose name they supply (excluding that employee). For example, if the user enters Zlotkey, find all employees who work with Zlotkey (excluding Zlotkey).

```

1  SELECT last_name, hire_date
2  FROM employees
3  WHERE department_id = (
4      SELECT department_id
5      FROM employees
6      WHERE UPPER(last_name) = UPPER(:last_name)
7  )
8  AND UPPER(last_name) <> UPPER(:last_name);
9
